VITAFLOW

- INSTALLATION GUIDELINE RECOMMENDATIONS:
- FOR LONG INLET LINES, USE 3" PIPE AND REDUCE AT EDUCTOR TO 2" (50mm).
 - ALLOW FOR STRAIGHT PIPE ON THE EDUCTOR DISCHARGE EQUAL TO 6-8 TIMES THE DISCHARGE PIPE DIAMETER.
 - ALL BENDS ON THE DISCHARGE SHALL BE 45 DEGREES OR SHALL HAVE A RADIUS OF 2 1/2 OR LARGER TIMES DIAMETER OF PIPE.
 - EDUCTORS ARE SUPPLIED TO FIT THE REQUIREMENTS OF EACH APPLICATION.
 - CUSTOMER SHOULD ADVISE INSTALLATION PIPING DIAGRAM TO VM TO REVIEW PIPE FRICTION LOSSES TO AVOID EXCESSIVE FRICTION LOSSES WHICH COULD IMPAIR PROPER EDUCTOR OPERATION.

- NOTES:
- BREAK ALL SHARP EDGES .005 CHAMFER
 - ALL INTERNAL SURFACES TO BE SMOOTH AND FREE OF BURRS OR STEPS.
 - .XX C DIMENSIONS INDICATE EITHER CAST OR OTHER WITH .06 TOLERANCE
 - EDUCTORS MUST NOT SUPPORT PIPING.
 - INSTALL USING ALL MOUNTING LUGS.
