PUMP IT DRY with VF EDUCTORS & EJECTORS

VF STRIPPING EJECTORS for Bilge – Ballast – Cargo

Permanently installed ejectors are used to strip ballast, bilge, cargo or other spaces that regularly have to be pumped out. The VF 1802 Series are high suction volume jet pumps. Applications include stripping and gas freeing Cargo Tanks, Bilges, Spud Cans, main & secondary drainage, pumping cement and drilling mud.

These VF ejectors can be fitted with tungsten carbide throat linings for severe wear and to prevent erosion when pumping sand. Standard construction uses a Bronze body with a monel nozzle. Some models are also available in 316 Stainless Steel and Carbon Steel. All VF Ejectors are customized to fit the requirements of each application.

^^ can be supplied with a 9" or 10" discharge

PUMP IT DRY with VF EDUCTORS & EJECTORS

1802-8"X – 316 Stainless Steel Eductors with 316 SS Wear Lining
Mud System Noble Drilling – Offshore Oil Platform

Typical Materials

- **Body:** Bronze
Carbon Steel
Stainless Steel
- **Nozzle:** Monel
316 Stainless
- **Wear Sleeve:** Tungsten Carbide
316 Stainless Steel

Applications

- Cargo Oil Ejectors
- Ballast Water Ejectors
- Bilge Ejectors
- Drilling Mud Pumping
- Spud Can Drainage
- Main Drainage Pumping

1802-10" LX Carbon Steel Eductor – Drilling Rig # 226 QATAR
Global Sante Fe

Features

- Maintenance Free
- No moving parts
- Will not lose suction while motive fluid pressure is maintained.
- VF Ejectors are supplied to meet the requirements of each application.
- Available with removable wear lining for abrasive fluids.

1802-10" L Bronze Eductors – Tanker Conversion – Bilge Stripping
Canada Steamship Lines – CSL 'THEVENARD'
